Care & Maintenance Guidelines:

Maintaining your GFO Quartz is simple and easy.

- For every day cleaning use a soft sponge or dishcloth with warm water.
- For stubborn or greasy clean-ups use a gentle liquid cleaner like Mr. Clean, 409, Simple Green, Fantastic etc. or ordinary dish washing detergent e.g., Palmolive with warm water and a “White Scotch Brite”
- Never use red or green Scotch Brite on GFO Quartz as they contain aluminum oxide (the same abrasive in sandpaper) and may dull GFO Quartz’s finish.
- Do not use abrasive cleaning agents such as regular Comet and Ajax. If needed, Bon Ami and Bar keepers' friend are both approved nonabrasive cleaning powders that will clean without affecting GFO Quartz’s finish.
- Though most common household cleaners have no effect of GFO Quartz, never allow your GFO Quartz countertop to encounter drain cleaners, paint strippers or products containing Hydrofluoric acid, Methylene chloride, Trichloroethylene, or any product with a very high or very low PH. These types of chemicals may etch or discolor the surface of GFO Quartz.
- There is no need to seal your GFO Quartz countertop. Sealers cannot penetrate GFO Quartz and remain on the surface. Eventually the sealer will start to wear off unevenly in high use areas causing the polish to appear inconsistent.
- GFO Quartz is scorch resistant and under normal conditions is not affected. Always use a trivet or hot pad between GFO Quartz and any heat generating device including but not limited to crock pots, deep fryers, hot pots and pans or electric skillets. Sudden or rapid change of temperature or sustained heating, especially near edges and cut outs, may create enough thermal expansion energy to cause your countertop to crack.
- Follow these simple cares and use guidelines and your GFO Quartz countertop will provide you with many years of trouble-free use.
